Wednesday 11:15-12:15 pm					
W3	10777	HCM 8.9 and Beyond This presentation provides an overview of the new features and enhancements delivered across the PeopleSoft HCM product family in 8.9. Highlights include the new Absence Management module, Union Management, Person Model, and Flexible Security. <i>Melanie Lougee, PeopleSoft</i>	HRMS - PeopleSoft Vision	118	8.9
W3	10688	Systems Integration in an ERP World Organizations are struggling with how to source and integrate functionality from various applications software vendors. This presentation will introduce different integration approaches ranging from data-oriented integration through process-based integration techniques and web services. Additionally, it will explore how ERP vendors are modifying their products to enable easier integration. <i>Julie Smith David, Arizona State University</i>	On Campus - Case Study	117	7.5
W3	10119	Why Gamble on a Successful ERP Implementation? When leading a team through transformational times, why gamble with the results of your ERP implementation? Use a comprehensive change management roadmap that assesses your barriers to changes and incorporates solutions that provide tangible results, to ensure a successful implementation. Our Presentation focuses on common barriers to change, business reasons for change, a Change Management Roadmap, Solutions, Impacts on your organization, Frequently Asked Questions. <i>Kelly Wagner, Empower Solutions</i>	Project Mgmt - Vendor	119	8.8
W3	10316	Corporate Systems Development Methodology in a Rapidly Changing Higher Education Sector Student systems development methodologies need continual reassessment to keep in step with current rapidly changing higher education business requirements. This presentation covers areas such as developer communication skills, iterative prototyping, development of user requirements using desk top applications for prototype development and simplified project management techniques. <i>Malcolm Bullock, University of Newcastle</i>	Project Mgmt - Case Study	116	7.6
W3	10604	Procure to Pay - A Sure Bet Procure to pay overview from Requisition through payment. Topics include Requisitions, RFQ, Purchase Orders, Shipments, PO Vouchers, Payments, Approval workflow, and using the item catalog. Discussion will include AES/PHEAA's setup, customizations, and tips and tricks for success. <i>Gina Dzanko & Don Bennett, AES/PHEAA</i>	Public Sector - Tips & Tricks	122	8.4
W3	10694	Engaging Faculty in Faculty Events What do institutions need to know about faculty beyond appointment data, career trajectory, and teaching activities? In response to this question, College of the Holy Cross has developed an events tracking module within SA to track faculty activities. It features an intuitive self-service application that encourages faculty to enter and maintain their own faculty file data as well as generate annual and cumulative reports. <i>Margaret Freije & Debbie Neal, College of the Holy Cross</i> <i>Sam Williamson, The Cedar Group</i>	Reporting and Analysis - Case Study	310	8.0
W3	10736	Building a Reporting Metadata Explorer Santa Clara University is using RDS and Cognos ReportNet for reporting and analysis. We have built a Web-based Reporting Metadata Explorer (RME) that documents the data sources and table joins. It enables users to request changes to RDS/Cognos and manages the review process. We will demonstrate RME and discuss its development and planned enhancements. <i>Rod Myers, Santa Clara University</i>	Reporting and Analysis - Case Study	312/317	8.0
W3	10368	Security For Test/Development Databases. Southern Methodist University has 8 test/development databases for the PeopleSoft Higher Education application. This seminar will explain how SMU HE Security Admin keeps a handle on access to test/development databases. <i>Stephen Forrest, Southern Methodist University</i>	Security - Case Study	311	8.0
